EDUCATION

MSc Computer Science

Anglia Ruskin University,
Cambridge, UK
2014 – 2015

BSc Games Design & Development

Anglia Ruskin University,
Cambridge, UK
2010 – 2013

React Native developer with 6+ years of professional experience building and releasing production mobile apps end-to-end — including iOS App Store and Google Play submissions — currently delivering Santander UK's SME banking app at Globant. Background spans fintech, public-safety and IoT/access-control, with earlier native Android experience.

EXPERIENCE

- 🕒 **React Native Developer — Globant** Jan 2025 – Present
 - Building Kingfisher, Santander UK's mobile banking app for SMEs, in React Native + TypeScript, with state managed via XState.
 - Full ticket-to-production workflow: Jira → implementation → PR review → merge, on a ~30-person team running 2-week sprints.
 - Heavy test coverage: Jest plus a dedicated E2E suite in WebdriverIO + Appium; GitHub Actions for CI/CD; Dynatrace for monitoring.
- 🕒 **React Native Developer — Genasys Inc.** Oct 2023 – Dec 2024
 - Built and maintained features for Genasys Protect (a public-safety / emergency-alerting app) and other internal apps, with Redux for state management.
 - Collaborated with cross-functional teams (design, QA, backend) to ship features across iOS and Android from a shared GitHub codebase.
 - Took part in code reviews, bug triage, and sprint planning as part of the day-to-day development cycle.
- 🕒 **React Native Developer — Dormakaba Spain** Feb 2022 – Nov 2022
 - Developed and maintained Dormakaba's digital door-lock mobile apps (React Native, Redux), implementing Figma designs per Product Owner specs.
 - Coordinated Agile Release Trains (SAFe) with Dormakaba's European engineering division in Germany and Switzerland.
 - Maintained the team's backlog and resolved app issues sprint over sprint; attended Dormakaba's hackathons in Zurich roughly every three months.
- 🕒 **Android Developer — Ibermática** Jun 2019 – Jan 2022
 - Built ONCE's new Point-of-Sale terminal (native Android/Kotlin) from the ground up — it shipped to production and remains the terminal used by all vendors in Spain today.
 - Built a companion web management tool (React) for controlling users and point-of-sale status.
 - Worked in 2-week agile sprints, writing unit tests for new features and coordinating directly with Product Owners.
